REPORT

OF THE

SUPERINTENDENT OF EDUCATION

FOR LOWER CANADA,

FOR THE YEAR 1865.

EDUCATION OFFICE,
Montreal, 10th July, 1866.

To the Honorable the PROVINCIAL SECRETARY,
Ottawa.

SIR,—I have the honor to submit my Report on the state of public instruction for the year 1865.

In pursuance of the decision of the Committee intrusted with the superintendence of the printing of official documents, the Report having been published *in extenso* last year, and as it is to be so published only every three years, this Report is not accompanied with the extracts from the Reports of the School Inspectors, and contains only a summary of the statistics.

The statistics annexed to this Report evidence steady progress in the diffusion of the various branches of instruction. The following table gives the general results obtained since 1853. I must state that the mumber of institutions and pupils is, as usual, somewhat greater in this Table than in the great Synoptical table, or summary of the Reports of the Inspectors and Commissioners of Schools, owing to the fact that the former has been completed by the addition of the Table of Superior Education, which includes several institutions that do not appear in the great Synoptical Table.

TABLE of the progress of Public Instruction in Lower Canada, since the year 1853.

—	1853.	1854.	1855.	1856.	1857.	1858.
Institutions	2,352	2,795	2,868	2,919	2,946	2,985
Pupils	108,284	119,733	127,058	143,141	148,798	156,872
Contributions $	165,848	238,032	249,136	406,764	424,208	459,396

TABLE of the progress of Public Instruction in Lower Canada, since year 1853.—*Continued.*

—	1859.	1860.	1861.	1862.	1863.	1864.	1865.
Institutions	3,199	3,264	3,345	3,501	3,552	3,604	3,706
Pupils	168,148	172,155	180,845	188,635	193,131	196,739	202,648
Contributions $	498,436	503,859	526,219	542,728	564,810	593,964	597,448

—	Increase over 1853.	Increase over 1856.	Increase over 1858.	Increase over 1864.
Institutions	1,354	787	721	102
Pupils	94,354	59,507	45,776	5,909
Contributions $	431,600	190,684	138,052	3,484

The increase in the number of institutions of every kind amounts, this year, to 102; last year it was only 52; that in the number of pupils amounts to 5,909, against 3,608 in 1864. On the other hand, the increase in the amount of school contributions of all kinds, which was $28,453.72 for 1864, is only $4,184.39 for 1865. The following is a detailed statement of the several kinds of school contributions, year by year, since 1856. It will be noticed that the contributions for the building of school-houses exhibit but a small increase. I have already several times recommended a scheme of special grants for this purpose, which would stimulate this important part of our system of public instruction:—

TABLE of the amounts levied for Public Instruction in Lower Canada, from 1856 to 1865.

Years.	Assessment to equal grant.	Assessment over and above grant, and special assessments	Monthly contribution.	Assessment for erection of buildings.	Total amount levied.
1856	113,884 87	93,897 90	173,488 98	25,493 80	406,765 55
1857	113,887 08	78,791 17	208,602 37	22,928 63	424,209 25
1858	115,185 09	88,372 69	231,192 65	24,646 22	459,396 65
1859	115,792 51	109,151 96	251,408 44	22,083 57	498,436 48
1860	114,424 76	123,939 64	249,717 10	15,778 23	503,859 73
1861	113,969 29	130,560 92	264,689 11	17,000 00	526,219 32
1862	110,966 75	134,033 15	281,930 23	15,798 84	542,728 97
1863	110,534 25	134,888 50	307,638 14	11,749 76	564,810 65
1864	112,158 34	144,515 61	321,037 30	15,553 12	593,264 37
1865	112,447 09	147,158 23	324,801 87	13,041 57	597,448 76

TABLE shewing the sources of the difference of increase between, 1st, 1864 and 1863,—2nd, 1865 and 1864.

					Total Increase.
Increase of 1864 over 1863,	1,624 09	9,627 11	13,399 16	3,803 36	28,453 72
Increase of 1865 over 1864,	288 75	2,642 62	3,764 57	.....	.....
Decrease of 1865 over 1864,	.....	.....	.....	2,511 55	4 184 39

The five great divisions of Public Instruction are recapitulated, as follows, from the Superior Education Reports, the Reports of the Inspectors of Schools, and information obtained by this Department from other sources, in relation to independent institutions:—

RECAPITULATION OF THE FIVE GREAT DIVISIONS.

Divisions.	Number of Schools.	Effective Teachers.	Number of Pupils.
Superior Schools.....	10	79	818
Secondary do	210	1,099	28,613
Normal do	3	31	219
Special do	4	16	265
Primary do	3,479	3,561	172,733
Total.....	3,706	4,786	202,648

Under this Table, the Superior Schools consist of the Universities and independent schools of theology, law, and medicine. The Secondary Schools comprise classical Colleges, Industrial Colleges, and Academies for boys and for girls. Under the head of Special Schools are comprised Deaf and Dumb Institutions, Agricultural Schools, and Industrial Schools. Primary Schools comprise all schools, as well model and elementary schools placed under the control of the Commissioners and of dissentient Trustees, as independent schools, in relation to which we have been enabled to obtain information.

The following Table, with the exception of the two first items, which relate only to primary institutions, presents, as in previous years, the combined figures of the Superior Education Reports and those of the School Inspectors, in relation to the several branches of instruction:—

COMPARATIVE TABLE of the number of children receiving each branch of instruction, since the year 1853.

——	1853.	1854.	1855.	1856.	1857.	1858.	1859.	1860.	1861.	1862.	1863.	1864.	1865.	Increase over 1853.	Increase over 1858.	Increase over 1864.	Decrease over 1864.
Pupils able to read well	27367	32861	43407	46940	48833	52099	64362	67753	75236	77108	77676	75555	96491	69124	44392	20936	.....

do parsing	4412	9283	16439	26310	34064	40733	44466	46872	49460	50893	52244	60311	66237	61825	25504	5926	.....

In some of these branches, compound arithmetic, French grammar and English grammar, the increase appears to be very considerable. For the first time, there has been this year a diminution in the number of pupils learning geography.

I insert here, as I did for 1864, a Statement of the dissentient schools, divided into Catholic disentient schools and Protestant dissentient schools.

TABLE of Dissentient Schools and of their Teachers.

The Normal Schools have continued to produce the same satisfactory results as in former years. Last year's Report contained ample details in relation to the subsequent career of the youths sent forth by these institutions, and proved that nearly all of them had taught for at least the three years required by the regulations for admission to these schools, and that a very large number had remained teachers beyond that term. This information related only to the pupils of two schools, the Jacques Cartier School and the Laval School. The Report of the Principal of the McGill Normal School for this year affords, on this point, evidence of a no less satisfactory character. Fresh details in confirmation of this fact will also be found in the Reports of the Directors of the two other schools.

The following Table shews the number of pupils who have attended the Normal Schools since the establishment of these institutions:—

TABLE of the number of Pupils who have attended the Normal Schools.

School year.	Jacques-Cartier. School.	McGill School.			Laval school.			No. of male pupil-teachers.	No. of female pupil-teachers.	Grand total.
	Male pupil teachers.	Male pupil-teachers.	Fem. pupil-teachers.	Total.	Male pupil-teachers.	Fem. pupil-teachers.	Total.

Session 1864-1865.....	56	5	60	65	43	55	98	104	115	219

If we were enabled to establish a department for female pupil-teachers in the Jacques Cartier Normal School, as we have long suggested, our Normal Schools might then be said, with truth, to meet all the wants of the various classes of the population. In order to effect this, it would be necessary to increase the total grant in aid of the Normal Schools.

The following Table gives the total number of diplomas granted by these institutions since their establishment :—

DIPLOMAS granted to pupils of the Normal Schools since the establishment of these institutions.

Kind of Diploma granted.	Jacques-Cartier.	McGill.			Laval.			No. of male pupil-teachers.	No. of female pupil-teachers	Grand total.
	Male pupil-teachers.	Male pupil-teachers.	Female pupil-teachers.	Total.	Male pupil-teachers.	Female pupil-teachers.	Total.			
Academies	17	6	4	10	13	.....	13	36	4	40
Model schools.....	81	13	100	113	68	82	150	162	182	344
Elementary schools	77	27	207	234	27	95	122	131	302	433
Total.....	175	46	311	357	108	177	285	329	488	817

According to the Reports of the Directors of the Normal Schools, 503 pupils from these schools have engaged in teaching, and the number may be set down as somewhat greater, in view of the fact that the Principal of the McGill Normal School mentions only pupils teaching at the date of his Report, without taking into account those who had given up teaching.

It will be seen that many of these pupils have been teaching for four, five, six, seven, and even eight years, and that a great many of them have courageously located themselves in the poorest localities, and those most distant from the great centres—a fact which is honorable alike to these localities and to the zeal of the pupils.

I should fail in the discharge of my duty if I did not again most earnestly call the atten-

tion of the Government to the dilapidated state of the building used for the classes of the Jacques Cartier Normal School, and to the well-founded complaints made in relation to this matter by the Principal of the school, in his Report.

The necessity of completing our system of Normal Schools, by the establishment of a department for female pupil-teachers in the Jacques Cartier Normal School, and by the erection of suitable buildings for that school, and for the Quebec School, has often been urged upon the Government and the Legislature. However little success may have hitherto attended these representations, it is but right ro renew them.

It is the same as regards the necessity of increasing the aid granted to the Teachers' Saving Fund. The teachers subscribe only in small numbers, simply because they see that the scale of pensions is too low. Now, inasmuch as the number of subscribers is not increasing, but rather diminishing, it is evident that the Government will be under the necessity of abolishing this institution, and, in that case, it must in common justice repay, at the least with interest, to all the subscribers the amount of all their payments. This reimbursement would require a larger sum than the increased aid asked for.

The following Table shows the working of this institution since its establishment, and bears out the reiterated suggestions made in the matter.

TEACHERS' SAVING FUND.

Years.	Number of teachers who subscribed each year.	Number of Pensioners each year.	Scale of pension for each year of teaching.	Total of Pensions paid.
			$ cts.	$ cts.
1857	150	63	4 00	886 90
1858	74	91	4 00	2211 74
1859	18	128	4 00	3115 36
1860	9	130	3 00	2821 57
1861	9	160	3 00	3603 58
1862	10	164	1 75	2522 09
1863	13	171	2 25	3237 00
1864	7	170	1 75	2727 00
1865	11	160	1 75	2587 00

I shall refrain from enumerating again the reasons I have already so often set forth in my reports, and which should induce the Government and the Legislature to regulate these financial difficulties of this department—difficulties of which I have so often traced the history and the causes—and to insure in a permanent manner the aid granted for superior education, and to increase that of the common schools and poor municipalities. I am aware that these subjects are receiving the attention of the Government, and I must only hope that the heartfelt wishes of all true friends of education may be speedily realized.

Amongst the documents forming part of the Appendix will be found detailed reports of the inspection of the Boards of Examiners established at Aylmer and Portage du Fort, which I made in pursuance of a resolution of the Council of Public Instruction. Mr. Dunkin, under the authority of the same resolution, also visited the Catholic and Protestant Boards, sitting at Waterloo and Sweetsburg, and the Sherbrooke Board; but his reports have not yet been submitted to the Council.

The following is a summary of the Annual Statistical Tables, furnished by the Secretaries of the Boards of Examiners:—

ANNUAL Statistical Summary of the Boards of Examiners of Lower Canada, for the year 1865.

BOARD.	Number of days sittings lasted.	Number of Candidates examined.	Average number of Teachers examined in a day.	Number of Diplomas granted for Academies, 1st. class.		For Academies, 2nd class.		For Model Schools, 1st class.		For Model Schools, 2nd class.		For Elementary Schools, 1st class.		For Elementary Schools, 2nd class.		Number of Candidates admitted, and kind of Diploma. There is reason to believe, from this table and that of last year, that some improvement has taken place, in consequence of the regulation adopted by the Council; and the inspection which has been made of the different Boards has exhibited—in the general standard of primary instruction in Lower Canada—a much more satisfactory state of things than I should have dared to expect. The fact that a very considerable number of young persons wrote, before these Boards, dictations, which were faultless—in the threefold relation of writing, orthography and grammar—is of itself substantial proof of very great progress.

Nor is there any doubt whatever but that, independently of the progress evidenced by the increase in the number of schools and in the number of pupils, a very great improvement has taken place in the system of teaching, not only from the introduction of new branches and new methods, but from the ability of the teachers and the results obtained. This fact is confirmed by the remarks of the Directors of the Normal schools, who find the candidates for admission to the schools generally much better prepared, and by the statements to the same effect which have frequently been made to me by the directors of colleges and houses of superior education.

The new regulation of the Council and the examination programmes which have been published, have largely contributed to produce this result. In very many schools and educational establishments the pupils are prepared to undergo the examination before the Boards of Examiners, and though this is specially the Province of the Normal schools, the result is, that the programmes published by the Council of Public Instruction have been adopted in many places, and that the standard of primary instruction is evidently advancing considerably, owing to this measure.

I have the honor to be, Sir,

Your very obedient servant,

PIERRE J. O. CHAUVEAU,
Superintendent of Education.

TO THE COUNCIL OF PUBLIC INSTRUCTION.

EDUCATION OFFICE,
9th October, 1865.

I have the honor to submit the report of the Inspection I have made of the Boards of Examiners of the Counties of Ottawa and Pontiac.

OTTAWA BOARD.

On the 9th September last I visited this Board, established at Aylmer. Mr. John Wood is the Secretary. I examined the records, dictations and certificates, in his presence, and made to him and to the Reverend M. Michel, Chairman of the Board, such remarks as the circumstances seemed to require, independently of those I have now the honor to submit.

A register is kept of the meetings, independently of that of the examination. These two registers are regularly kept, and in perfect order, as are also the dictations and certificates which constitute the records of each examination—even the solutions of problems in arithmetic have been preserved. The certificates of age are often wanting, and the parish Priests and Ministers have invariably omitted to mention religious instruction. They merely certify to the morality and good conduct of the candidates. I had occasion to make the same remark for three other Boards, and I must state that, in that way, one of the most important objects the Council had in view—namely, to ascertain that the candidates possessed at least a certain degree of religious instruction—is frustrated.

In the examination of the dictations, out of a total of seventy-four dictations, I found seven decisions a little too severe; but all these cases involved only the difference between note *one* and note *two*. In all the cases in which the candidate was rejected on dictation, the decisions appeared to me to be correct. In eleven examinations the decisions appeared to me to be over-indulgent, as regards orthography; and in nearly all these cases I should have given note *three*, and rejected the candidate. It is to be remarked that the over-severe decisions appear in the first meetings, and those in which too much indulgence was shewn, in the last. Hence it would seem that the Board, after having shewn a little too much severity at the outset, in so far as regards first-class diplomas, had relaxed by degrees, until it became, perhaps, over indulgent, more especially as regards second class diplomas.

A great many of the dictations are too short; the writing is bad in some, and seems to have been judged with too much indulgence.

No candidate was dismissed on any of the several subjects of examination, other than dictation, which would lead to the suspicion of excessive leniency as regards the verbal examination.

In many cases a vote was taken, shewing that the examiners met together to examine the papers, and judged collectively, which is correct and in conformity with the regulations.

On one of the dictations I found a note to the effect that, notwithstanding several errors, it had been deemed right to grant a first-class diploma, in view of the excellent results attained in the other branches, and, therefore, the dictation was marked first-class, though it should have been second class. While doing justice to the motives that guided the examiners in this instance, I cannot approve of their decision.

In a good many examinations in which the dictation and writing seemed to me excellent, all the other matters were marked No. one, leading to the satisfactory conclusion that these teachers are thoroughly instructed and well fitted to discharge the duties of their calling. I may mention Messrs. DeCoeli and Eugène Long, natives of France; and of Mr. James Parkinson, and Misses Rhoda McKay, Julie Anne Merriman, Mary Belton, Ann Latimer, Jane McMaster, Mary Ann Evans, Helen Dodge and Sarah Hall.

Twelve sittings have been held since the passing of the Regulation, without counting the one held solely for the organization of the Board. There have always been four or five members present at the meetings. One of the members has only been present twice.

PONTIAC BOARD.

On the 11th September I visited this Board, which sits at Portage du Fort. I made, to Dr. Purvis, a member of the Board, and to Mr. LeBlanc, the Secretary, such remarks as the circumstances seemed to require. I conferred with these gentlemen, who pointed out to me the difficulties they have to encounter, and which, to a certain extent, may account for the irregularities I shall have to mention. I have reason to hope, however, that some improvement will take place.

There are no minutes of the meetings of the Board. The Secretary told me that there were generally four members present. Mr. Bastien has never attended. A portion of the register of examinations is still blank, and the results of the examinations have been entered therein only from the sitting of February, 1863. The object of the Regulation not having been thoroughly understood, the entries merely give the nature of the diploma granted, and a mark in each column to shew that the candidate was examined in the subject entered above, but the explanation of the result, by the entry of the figures 1, 2 and 3, has been omitted. Nor is there any entry to shew whether the diplomas were for English, for French, or for both languages. Out of fifty examinations, twenty-two dictations were wanting; in two other cases all the papers were wanting. Nearly one-half of the dictations which have been preserved are insufficient in length; some of them did not contain more than three or four lines. In some of the papers where the dictation was not to be found, the letters written by the candidate when applying for admission, exhibit good writing and good orthography. In a very large number of dictations the writing is excellent, and in this respect the generality of the candidates admitted, appeared to me to be remarkably proficient. Except as regards insufficiency on the score of length, nearly all the dictations I was enabled to see appeared to me to deserve the favorable decision given, both in relation to orthography and to writing. I found but one dictation upon which I should have rejected the candidate.

The whole respectfully submitted.

(A true copy.)

(Signed,) P. J. O. Chauveau,
Superintendent of Education.

Education Office,
Montreal, 27th Feb., 1866.

The Hon. Provincial Secretary,
Ottawa.

Sir,—I have the honor to transmit the scheme for the distribution of the grant for superior education, for the year 1865. There remained from the year 1864 a balance of six hundred and forty-eight dollars, which added to the sum to be distributed for 1865, forms the sum of sixty-eight thousand six hundred and forty-eight dollars.

I propose grants in favor of the following new institutions:—

Academy for Boys, Iberville	$150 00

Model Schools.

Bagotville	56 00
Côteau du Lac, convent	56 00
St. Jean Chrysostôme	56 00
St. Jérôme, convent	74 00
St. Joseph de Chicoutimi	56 00
St. Jacques l'Achigan	74 00
Grondines	56 00

Model Schools,—(Continued.)

Grande Rivière, Gaspé	74 00
St. Lin	74 00
Ste. Monique	56 00
St. Martin	74 00
N. D. de Portneuf	56 00
Percé	56 00
Ste. Brigide	56 00
Beauport	74 00
Waterloo and Templeton	74 00
Acton Vale—boys	74 00
do girls	74 00
Montreal, school in St. Mary's Suburbs	74 00
Trinity Church school	56 00
do do St. Ann street	74 00
do do St. Mathews	56 00
St. Roch, south, convent	74 00
Côteau Landing, diss	56 00

I propose also to increase the grant of the Boys' Academy of St. Jean Dorchester, by one hundred dollars, this institution having undergone a considerable developement during the course of this year, as well by the appointment of additional professors as by the introduction of new branches of instruction.

I propose also to increase by eighty dollars the grant of the Catholic Commercial Academy of Montreal, the commissioners having great difficulty in maintaining this institution with the insufficient aid paid to it by the City of Montreal.

The total amount of these new grants and increases forms a sum of one thousand eight hundred and ninety dollars; and in order to meet it, it has been necessary to effect in the scheme a reduction of one per cent. on the grants, except for institutions receiving less than one hundred dollars.

In this reduction, cents have been omitted in favor of each institution when under fifty cents, and against the institution when over.

In relation to the following Model Schools:—Ste. Monique, Portneuf, St. Brigide, Beauport and Waterloo, the salaries, granted by the municipalities to the teachers, having appeared to me insufficient, I feel it my duty to recommend that I may be permitted to inform these municipalities that the sum granted is to be added to the salary of the teacher, and that I may be authorized to pay the sums directly to the teachers, and to give notice, if necessary, to the municipalities that if they should deduct the amounts from the salaries a like sum will be deducted from their next Common School grant.

The Reverend Mr. Burrage, who was considered to be charged with the duty of Secretary to the Royal Institution, having died, I struck out from the second item of the list the sum of four hundred dollars which was paid to him quarterly, this grant being looked upon as a continuation of the pension which was formerly granted to Mr. Burrage by the Legislature. The University of McGill College, nevertheless, has notified me that it has appointed Mr. Baynes to replace Mr. Burrage, and asks for a continuance of the grant made to enable it to pay the salary of a Secretary to the Royal Institution, basing its claim upon the terms in which the grant has always been mentioned in the official documents, since the passing of the Act respecting aid for Superior Education.

Although this claim appears to me not to be well founded, or at least not in conformity with the intentions of this department and of the Government, when the first distribution was made under the present system, I nevertheless deem it my duty to submit it to the Government. I have also to report a petition of the College of Ste. Anne Lapocatière, asking for additional aid. This institution which renders the greatest service, and, I must say, makes the greatest efforts for the spreading of every branch of instruction in that part of the country in which it is situated, now receives the maximum amount granted to classical colleges. It seems to me therefore very difficult to grant this request without increasing to the same extent the grants of the other institutions placed on the same list, which would be impossible in the present state of the Superior Education Fund.

I transmit with this report the papers connected with this matter, which were sent to me from your department.

The amount of the various lists is as follows :—

Universities	$ 4,277 00
Classical Colleges	13,249 00
Industrial do	7,754 00
Academies for boys and mixed	12,875 00
do girls	10,250 00
Model Schools	18,628 00
Making in all a sum of	$67,033 00

for which I beg that you will obtain the issue of a warrant or of a letter of credit in my favor.

You will observe that taking into account the balance left last year, and the sum appropriated in virtue of the Act respecting superior education, there will still remain a sum of $1,615.00 to meet fresh demands or omissions.

I have the honor to be, Sir,
Your obedient servant,

P. J. O. Chauveau,
Superintendent of Education.

Education Office,
Montreal, August, 1865.

To the Hon. Provincial Secretary,
Quebec.

Sir,—I have the honor to submit an additional list of institutions of superior education, which I was unable to enter in the first list forwarded to the Government in January last, either because their reports had not reached me at that time, or because there was some reason for not admitting them then. It amounts to the sum of $296.00, for which sum of two hundred and ninety-six dollars I have the honor to request that you will recommend the issue by His Excellency the Governor General of a warrant in my favor, against the balance of $944.00 remaining to the credit of the Superior Education Fund, for the year 1864.

I have the honor to be, Sir,
Your obedient servant,

P. J. O. Chauveau,
Superintendent of Education.

Additional list of claims for aid out of the Superior Education Fund.

	1864. Pupils.	1863. Aid.	1864. Aid.
Eaton Academy	48	.....	74 0
St. Alexandre, Kamouraska (E. M)	80	.....	74 0
St. Hermas	99	74 0	74 0
St. Zéphirin	67	.....	74 0

REPORT

OF THE

JACQUES-CARTIER NORMAL SCHOOL,

FOR THE SCHOOL-YEAR 1864–5.

To the Hon. P. J. O. Chauveau,
Superintendent of Education,
&c., &c., &c.

Sir,—I have the honor to transmit my report on the state and progress of the Jacques-Cartier Normal School, during the school-year 1864–5.

We admitted this year again 56 pupils—33 former pupils and 23 new. They came to us from the following districts :—

Total Number of Pupils.	District of Montreal.	District of Terre-bonne.	District of Joliette.	District of Richelieu.	District of Three Rivers.	District of Iberville.	District of Beauhar-nois.
33 Former pupils.....	8	2	1	5	.....	8	
23 New pupils.....	9	.....	1	4	1	6	4
56	17	2	2	9	1	14	11

The pupils from the District of Richelieu almost all belong to the Parish of Berthier, while those from the districts of Montreal and Beauharnois are furnished by a large number of parishes.

The new pupils, generally speaking, had received no other preparation but that of the Model School of their village, with the exception of two who had been to college.

The following table shews the manner in which our fifty-six pupils were divided amongst the different classes.

	Former pupils.	New pupils.	Total.
Class of 3rd year.....	8	...	8
Class of 2nd year.....	13	1	14
Class of 1st year.....	12	22	34
Total.....	33	23	56

After the pupils had undergone two examinations, one in the middle of the year and the other at the end, I was enabled to lay before you the names of seventeen amongst them, to whom you were pleased to grant diplomas, namely :—

5 for Academies.
8 " Model Schools.
4 " Elementary Schools.

I had then the honor to state that several pupils of the first year having evinced a desire to continue their studies for another year in the superior class, it had been deemed useless, as in previous years, to grant them the elementary school diploma.

I have given in the following table what I may call the result of the whole year, or the course pursued by our pupils.

	Former pupils.	New pupils.	Total.
Number of pupils who have received the diploma,	15	2	17
" " continuing their studies,	6	14	20
" " left to engage in teaching,	3	0	3
" " studying at college, etc.,	5	1	6
" " left for various reasons,	3	3	6
" " left on account of illness,	1	3	4
Total.....	33	23	56

Up to this day, 429 pupils have been admitted to our school, namely :—

School year 1857.....	18
" " 1857-58.....	46
" " 1858-59.....	50
" " 1859-60.....	53
" " 1860-61.....	52
" " 1861-62.....	41
" " 1862-63.....	57
" " 1863-64.....	56
" " 1864-65.....	56
Total.....	429

This is a yearly average of 47⅔.

The number of diplomas granted to this day is 175, namely :—

17 for Academies,
81 " Model Schools,
77 " Elementary Schools,

Being a yearly average of 19⅓.

As several pupils have received successively the three diplomas, the number of diplomas does not represent the number of teachers, which is, in reality, only 114, namely :—

17 who have received the Academy diploma.
64 " " Model School do.
33 " " Elementary School do.

Total - - 114, being an annual average of 12⅔.

The following tables exhibit the results we have obtained with the above number of teachers, since the commencement of the Jacques Cartier Normal School.

You will see from these tables that several of our former pupils still continue to teach, in spite of the difficulties attending an occupation so laborious and so poorly remunerated. Such perseverance certainly deserves the attention of the Government.

SYNOPTICAL TABLE, shewing the result of the Jacques Cartier Normal School, to this date.

- 114 Teachers, of whom
  - 55 were not obliged to teach from the end of 1864, but of whom.....
    - 21 are still teaching, and have taught as follows...
      - 4 for 8 years.
      - 2 " 7 "
      - 4 " 5 "
      - 11 " 4 "
    - 18 have taught, namely....
      - 8 " 4 "
      - 1 " 3 "
      - 2 " 2 "
      - 7 " 1 year or thereabouts.
    - 16 have not taught, of whom.....
      - 5 have entered college.
      - 2 did not find situations.
      - 5 are otherwise engaged.
      - 2 were sick.
      - 2 died.
  - 59 are still bound to teach, of whom.....
    - 32 have been teaching.....
      - 8 for 3 years.
      - 11 " 2 "
      - 13 " 1 "
    - 27 are not teaching, of whom .....
      - 1 entered college.
      - 1 taught 1 year.
      - 2 have not found situations.
      - 3 are sick.
      - 1 died.
      - 17 have just received their diplomas.

I regret being compelled to remind you, once more, of the dilapidated state of the house occupied by this school. I am aware of the representations you have made, and in returning to the subject I am impelled by an imperative sense of duty. I cannot consent to bear any longer a burthen of responsibility such as now weighs upon me :—

1. The plumb-line shews an inclination of the whole building towards the east, of at least six inches. This is almost the thickness of the wall, which is very high, and directly exposed to winds from the west.

2. During the motion necessarily resulting from the entrance and exit of the classes, it is impossible to write in my office.

3. We are compelled to prohibit all recreation and exercise involving any degree of bustle or activity. During the high winds of winter I was compelled to interrupt the studies and classes, because the pupils were so much disturbed by fear as to be unable to study.

Moreover, we are suffering extremely for want of room. This has prevented us from applying in our course a true method of teaching; at the same time that we are deprived of the certain profit we should have realized by admitting a larger number of children to the Model School.

At the present moment our recreation ground is encumbered with firewood and bricks, so that it has anything but the appearance of a place set apart for the mental and bodily relaxation of young students. I shall not appeal to the elementary principle, that locality exerts the greatest influence on moral and physical education alike ; suffice it to say that play, varied exercise and gymnastics, are absolutely necessary for the health of the young, and above all of youth such as ours, nearly all of whom come from the country.

I have the honor to be, Sir,

Your very humble servant,

H. A. B. VERREAU, Ptre.,
Principal.

REPORT

ON THE

McGILL NORMAL SCHOOL,

FOR THE SCHOOL YEAR 1864-65.

To the Honorable
The SUPERINTENDENT OF EDUCATION, L.C.

SIR,—I beg leave, as supplementary to my Report of last year, to state the following facts in regard to the employment of teachers trained in the McGill Normal School.

The total number of persons who have received diplomas of this school since its commencement in 1857, is 268, being a yearly average of 30. Of the whole number, only 42 are male teachers.

The number reported to me as actually engaged in teaching is 198, as follows :—

Under the Elementary Diploma	97
Under the Model School Diploma	91
Under the Academy Diploma	10
	198
To these should be added, as now studying for the advanced Diploma	8
Total	206

Of the remainder, 24 are members of our class of last year, and may be supposed to be unemployed, owing to the short time which has elapsed since they received the diploma, and 39 are members of the classes of previous years, who have not been reported as engaged in teaching. Of these, one is dead; about 16 were married soon after leaving the school, a few have removed to places beyond the limits of Canada, and the rest have either failed to obtain situations, or have neglected to inform me of the fact. It is to be observed that this applies more to female than to male teachers, the latter being almost certain immediately to obtain places.

Of the time during which our teachers have been employed I have no certain information, but on looking over the lists I find that a considerable proportion of those who took the diploma in the earlier years of the school are still employed as teachers, and that several of them occupy important and permanent positions. I have reason to believe that the average time considerably exceeds the limit of three years.

I may also mention, as an encouraging fact in regard to the higher kind of training given by the school, that the proportion of those holding the Academy and Model School Diplomas who have been unable to obtain situations is very small indeed.

I have the honor to be, Sir,

Your obedient servant,

J. W. DAWSON,

Principal, McGill Normal School.

To the Honorable the
SUPERINTENDENT OF EDUCATION.

SIR,—In the past session the total number of students was 65. Of these five were males and 60 females; 28 were resident in Montreal and 37 in other places. Four were studying for the Academy Diploma, 20 were studying for the Model School Diploma and 41 were studying for the Elementary Diploma. In addition to the above, three Bachelors of Arts of McGill University have entered their names as applicants for the Academy Diploma, under the new regulations in relation to that diploma.

The total number of students has not been so large as in some previous sessions; but I believe that in thoroughness of preparation and in the success of their labours, our students of this session are superior to those of previous years. On this account, we are able to recommend nearly as many persons for diplomas as in some previous sessions when the attendance has been larger.

At the close of the examinations the following candidates were recommended for diplomas:—

For the Academy Diploma	7
" " Model School Diploma	10
" " Elementary School Diploma	26
	43

These numbers raise the total number of diplomas granted by this school to 355, and the total number of persons who have received diplomas to 247.

The most important novelty in the working of the school during the past session has been the commencement of a class in training for the Academy Diploma. Four young ladies have entered this class, and have pursued their studies successfully during the session. This class has necessarily been of the nature of an experiment; and though I must regard it as in the circumstances highly successful, we shall be prepared in the next session to renew it with improvements and modifications which I trust will render this part of our work still more efficient. The school is much indebted to Mr. McGregor, Master of the Boys' Model School, for relieving the Professors of the Normal School from the classical teaching in the Academy and Model School classes. Without this aid it would have been impossible, with the present small staff of the school, to enter on this work. I have also to express my obligations to Professors Hicks and Robins for the cheerfulness with which they have given the extra labors necessary for this class.

The training of female teachers for the Academy diploma, or in other words, to enable them to prepare young men to enter college, may seem to some persons in this country a project of doubtful utility; but it is not without example elsewhere, and I have no doubt that in the present state of education here, it may enable some students to attain to such preparation who otherwise would have failed to obtain it. Its success will also contribute to raise the estimation in which female teachers are held, without, I trust, injuriously competing with the employment of male teachers, of whom, however, at the present rates of remuneration, it is impossible to obtain a sufficient number.

I also hope that the facilities now offered by the Normal School for this higher training will bring to us a larger number of young men, some of whom have, I know, been deterred from entering by the want in our Normal School course of some of the studies necessary for the Academy Diploma.

It gives me much pleasure to report that I have received many testimonies to the increasing estimation in which our diplomas are held, and that I have reason to believe that a large majority of those who have taken diplomas have been usefully employed in teaching. Owing to changes of place and other circumstances, it is, however, impossible for me to present accurate statistics on this subject.

Our staff of Professors and Teachers in the Normal and Model Schools remains unchanged; and all its members have laboured with their usual efficiency. It is a ground for congratulation that the choice of instructors for these schools has been so fortunate, and that we have been able to go on for so many years without material change.

I have as usual to report that the Ministers of the city have continued their useful work of religious instruction in the Normal School, and that the arrangements with the

Model School of the Colonial Church and School Society in Bonaventure street have continued to be carried out satisfactorily.

I may again refer to the need of some extension of our building for a chemical laboratory, and also for aditional recitation-rooms for the Model Schools, and to the applications repeatedly made for an increase of salary for the two ordinary professors. I trust that these objects, so important to us and to the cause of education, and requiring so small an amount of public aid, will ere long attract the favorable attention of the Government.

It may be proper to state in this report that for several years regular exercises in drill and calisthenics have been given to the boys and girls of the Model School. A Rifle Association has been formed among the senior boys. It was organized September 4th, 1864, and has been drilled regularly twice a week. Arms have been supplied by the Government, uniforms by the boys themselves and swords for officers and an armory for the rifles by the school. The total number in the corps during the session has been 45. The number actually in the corps at present is 25. This number might be considerably increased, could carbines or other light weapons be furnished, the heavy rifles supplied being unsuitable for any but the larger boys. It is hoped that this defect may be remedied next session. At the inspection on the 16th July last, the Brigade Major spoke markedly of the good drill of the corps. I may further state that in addition to the regular drill it has from the first been the practice to give to the girls and boys two intermissions for play, of 15 to 20 minutes each, in addition to the recess at noon, in the course of each day, and that this has been conducive to the good working of the school.

I have the honor to be, Sir,

Your obedient servant,

J. W. Dawson,

Principal.

REPORT

ON THE

LAVAL NORMAL SCHOOL,

FOR THE SCHOOL YEAR 1864-65.

To the Honorable P. J. O. Chauveau,
Superintendent of Education, L. C.,
Montreal.

Sir,—I have the honor to present to you my Report for the School Year 1864-65.

There has been, as usual, a large number of applications for admission, especially from female candidates. I observe with pleasure that, in general, the females who so present themselves are better prepared, but I cannot say as much of the young men. Those who have received instruction from our former pupils have the further advantage of being already acquainted with our system.

I still maintain that two years are not sufficient for the thorough imparting of all the subjects of instruction included in our programme; and that pupils who aspire to an elementary school certificate cannot, in the short term of ten months, acquire such a knowledge of the system and method of instruction as to give any guarantee of success. I therefore again recommend that pupils who have never engaged in teaching should be held to two years' of study, in order to obtain an Elementary School certificate, and to three years' study to obtain a Model School certificate; and I venture to hope that you will be pleased to submit this suggestion to the favorable consideration of the Council of Public Instruction.

During the year, our classes have been attended by 98 pupils; the number has never before been so large. Of 43 male pupil teachers, 3 were preparing for Academy diplomas, 16 for Model School diplomas, and 24 for Elementary School diplomas; the three former, however, abandoned their design in the course of the winter. Of the 55 female pupil teachers, 12 aspired to Model School diplomas, and 43 to Elementary School diplomas.

Of these 98 pupils 32 obtained certificates, that is to say, 12 male and 20 female teachers; 17 were for Model Schools and 15 for Elementary Schools. These you were pleased to distribute yourself, at the same time imparting to the candidates judicious advice, which I hope to see constantly applied practically by them.

Mr. Doyle having resigned his situation, Mr. Daniel McSweeney, who has been engaged in teaching for many years, was appointed in his stead on the 13th December last. By his zeal and assiduity and his dignity of conduct, the latter has already acquired the esteem and respect of his pupils, and has caused them to make rapid progress in the study of the English language.

With respect to the other professors, I continue to have every reason for congratulation, in respect of their devotion to their onerous and manifold duties. It may not be inappropriate here to repeat that which has been strongly insisted upon by you in your preceding reports,—that in the Laval School we are all overburdened with work, and that urgent necessity exists for providing a remedy for that state of affairs.

I continue to receive news, generally favorable, in respect of our pupils who are teaching schools. I especially observe, with the greatest pleasure, that many of those who received diplomas from our Institution at the outset are still engaged in teaching, and most of them with great success.

Of 89 male pupil teachers holding diplomas from our school,—

70 are teaching, or have taught;
3 died before teaching;
3 are still at the Normal School;
1 is completing a Collegiate course;
12 only have not taught.

89.

Of 167 female pupil teachers holding the same diplomas,—
156 are teaching, or have taught;
5 are still at the Normal School;
6 only have not taught.

167

In eight years, therefore, diplomas have been granted to 256 individuals. Of this number 226 have engaged in teaching, and 30 only have not done so, several in consequence of illness, and some in consequence of failing to obtain situations soon enough.

On an average, of 32 pupils receiving diplomas in each year, 28 have engaged in teaching, that is to say, seven-eighths of the whole. Such a result cannot possibly be surpassed.

To the honor of our pupil teachers, both male and female, I must say that they have never shrunk from the remote situation of the places to which they have been called, nor from isolation and privation. They are scattered from one extremity of Lower Canada to the other. I consider it right to mention to you some examples of self-denial and courage on their parts. Miss Ann Enright has passed two years at Bonaventure Island, one league in the offing from Percé; Miss O. Forgues is teaching at Paspébiac; Miss D. Croteau, at Carleton; Miss S. Gravel, at Cascapédiac; Misses E. Bélanger and J. Larochelle, at Percé; Misses H. de Tonnancour, E. Bacon and J. Dancasse, at Grand Bay; Misses E. Sinnot, H. de Tonnancour, C. Vallée and G. Letourneau have, in turn, taught at Escoumains; Miss O. Asselin has also proceeded to Papineauville. Others are also far from here, but are near their relatives.

Among our male pupil teachers Mr. Louis Ouellet taught for two years at Esquimaux Point, and continues to do so at Grand Bay; Mr. Laroche, at Chicoutimi; Mr. Bacon, at Maria; Messrs Pichet and Trépanier, at Port Daniel; Mr. Goulet, at Matane, and subsequently at Anse-aux-Grisfonds; Messrs Robitaille and Provensal at Rivière-aux-Renards; Mr. D. Couture, at Cap des Rosiers.

Our department of female pupil teachers has already furnished a considerable number of individuals to the religious orders which take part in teaching: to the Ursulines, three professed nuns and four novices; to the Sisters of Charity, two professed nuns and two novices; to the Sisters of the Good Shepherd, five professed nuns; to the Ladies of Jesus-Mary, at St. Joseph de Lévis, two novices. One has died in each of the following houses: the Ursuline Convent; the Convent of the Good Shepherd; and the Convent of Jesus-Mary. One of the professed Ursuline nuns, Mother Mary of the Visitation (Miss Luce Couture), with two novices (Misses Mondor and Mangan), has gone to aid in founding a new house of her order at Ontonagon, in the State of Michigan; she is now its Superior. Another of our pupils has taken the veil at the Ursuline Convent, in New York.

In like manner, among our male teachers, Mr. Cyrille Fournier has taken the first vows among the Clerks of St. Viateur. Thus it is, day by day, that our pupils attain a position which better enables them to be serviceable to the youth of the country.

To say nothing of the better system which they, in common, strive to introduce into their classes, they have by their example largely contributed to the improvement of those of other schools; it is in my power to convey to you the agreeable assurance of a notable change in that respect.

We have this year to deplore the loss of a female pupil teacher, Miss Edith Pâquet, who died on the 18th May, among her relations at River du Loup (*en bas*), and of a former pupil teacher, Mr. François Ferland, who died on the 28th August, at St. Pierre, Island of Orleans. After having taught at Arthabaska, in a private family, and at St. Sauveur as assistant, he had shortly before assumed the charge of the Model School at Charlesbourg.

I have the honor to be, Sir,
Your very humble and obedient servant,
JEAN LANGEVIN, Ptre.,
Principal.
